

QY Metal Tech - Galvanized Grating RFQ Checklist

1. Product structure

- Bearing bar size, spacing, cross bar spacing and load direction.
- Panel size, cutouts, banding, frames, toe plates and fixing clips.

2. Hot-dip galvanizing sequence

- Confirm cutting, welding, drilling and side plates before galvanizing.
- Avoid site cutting after galvanizing unless touch-up is planned.
- Confirm vent or drainage holes for closed sections when required.

3. Outdoor application review

- Outdoor walkway, trench cover, wet drainage area or coastal exposure.
- Smooth or serrated surface depending on wet or oily walking conditions.

4. Inspection and packing

- Check dimensions, bar spacing, welds, banding and galvanized surface.
- Confirm bundle labels, pallet marks, packing method and destination.

5. Send for quotation

- Drawings, quantity, destination, load notes, finish requirement and packing preference.
- Email: sales@qymetaltech.com
