

QY Metal Tech - Handrail Layout Checklist

1. Send platform, stair or walkway layout drawings with dimensions.
2. Confirm handrail height, stanchion type, post spacing and fixing method.
3. Mark corners, return bends, stair transitions, openings and access gates.
4. Confirm kick plate, toe board, end cap and removable rail requirements.
5. Specify galvanized, painted or powder coated finish and color if needed.
6. Separate quantities by floor, area, section number or installation zone.
7. Add bundle marks, packing notes, destination and project deadline.
8. Send drawings and photos to sales@qymetaltech.com for quotation review.
